Youth Poll Methodology and Sample

- Mail-based survey fielded from April 29, 2022, to October 31, 2022.
 - A series of five mailings were sent to eight different cohorts semimonthly that invited recipients to participate.
- Final Youth Poll Sample: 4,672 youths ages 16 through 24
 - 3,637 (78%) youths ages 16 through 21—the metrics presented herein focus on this age group.
 - 1,035 (22%) youths ages 22 through 24
- Weighted to reflect the general population on several dimensions:
 - Gender
 - Age
 - Race/Ethnicity
 - Educational attainment
 - Region
- Stratified Random Sample
- Note: Estimates are charted to precise values. Labels are rounded to the nearest whole percent.
- Note: Certain slides provide estimates by race/ethnicity.
 - The December 2010 effort was the first Youth Poll with a sufficiently large enough sample size to report estimates for Asian youth. Asian youth estimates are included only at the overall level and not by gender because of sample size restrictions. The effective sample size for Asian youth is small, and results should be interpreted cautiously.
